

## **5610 Pyxis Small S Courtesy Light**

The Pyxis range of LED courtesy lights features a polymer LED light body which is then dressed with a number of different bezels. In the case of the Pyxis Small S, the light body is left without a bezel, making the fitting extremely discrete, especially when off. This product offers excellent and harmonious integration into the interior or exterior designs.

The Pyxis range of courtesy lights can be supplied with the optional installation cup. This cup can be bonded in place or set into GRP moldings during the initial constructional phase. The light can then simply push into the cup when being installed. This system results in a highly serviceable solution that can be easily upgraded or changed in the future.

- Opaline polymer courtesy light
- Available in 0.5W SMD LED and 1.5W Power LED versions
- For interior and exterior use
- Available in a number of LED colours
- Optional installation cup available
- Weight (kg) 0.01
