

## T20188 Electric Table Pedestal

**3 stage electric pedestal made from anodised aluminium and 316 grade stainless steel.**

- 1st stage and base constructed from 316 grade stainless steel.
- 2nd and 3rd stages finished in polished aluminium.
- Featuring a square top plate with rounded base and columns.
- Top Plate (mm) 400.00 x 400.00
- Base (mm) Ø 400.00
- Max. Height (mm) 690.00
- Min. Height (mm) 340.00
- Max. Lifting Capacity (kg) 100.00
- Max. Table Size (mm) 1300.00 x 950.00
- Finish Anodised Aluminium With 316 Stainless Steel
- Weight (kg) 23.00

## Multi functional Living

This marine-grade stainless steel table pedestal is the ultimate automatic table solution. This support will allow a table to be raised and lowered at the touch of a button and convert a dining space into a relaxation space or even aid in the conversion of a seating area into a sleeping area. This particular model is known as a 3-stage variant and is made up of 3 separate columns, 2 of which are moving. A 3-stage pedestal offers a greater range in height adjustability.

Electric pedestals have been key to maximising space on board yachts for many years and can offer the same advantages to non-marine projects too. If you are planning the incorporation of an automatic table support into your project then please do not hesitate to contact us to discuss your requirements.

## Strength

The pedestal features powerful internal actuators which can raise and lower table tops up to 100kg in weight. This means that tables made from solid timber, glass or tables with stone or marble inlay can all be considered. It is essential however to never exceed the maximum table size when designing your solution.
