

4197 Flatwash Slimline Exterior Shower

Flatwash is a pull-out hand shower for exterior use. The product is made entirely from brass and is supplied in a chrome plated finish. The innovative slim line design helps the shower seamlessly blend into the installation surface. The integrated flow regulator (4197A only) features a ceramic cartridge system which ensures long lasting performance and a smooth operation.

The shower can be installed on vertical and horizontal surfaces. Thanks to the product's clever gasket system, the shower prevents water from running down the hose and into and behind the installation location.

A matching shower mixer and attractive installation plate are available as accessories.

GINEICO
