

## 5025 Sextans T

### Marine-grade brass ceiling spotlight in a chrome plated finish

- Power LED high performance module
- Multivoltage product will operate between 10-30Vdc
- Fully dimmable
- Weight (kg) 0.19
- Manufacturer Foresti & Suardi
- Installation Recessed
- Light Element Type Power LED
- Lens Angle 36°
- Wattage 3.6W
- Input Voltage 10-30Vdc
- IP Rating IP20
- Dimmer Yes
- Bezel Size (mm) Ø70.00
- Cut-out Size (mm) Ø58.00
- Depth (mm) 27.50
- Finish Chrome

## Power LED

The power LED module is a market leader. With LED chips positioned in the centre of the fitting, the large incorporated reflector is easily able to direct output away from the fitting with minimal loss of Lumens.

The central arrangement of the chips also result in a completely dot-free illumination akin to that of a halogen fitting.

## Heat Dissipation

The SMD module is a less expensive alternative to our Power LED range. The SMD module represents excellent value for money, achieving a practical balance of performance and style. It is an excellent choice for those looking to use an LED solution whilst keeping an eye on costs. As standard, our SMD LED modules come in 3200K and 4000K white

## 10-30Vdc Power Regulator

The 10-30Vdc power regulator is always a remote item on the power cable of the fitting. This offers numerous advantages over alternative methods used by competitor brands. Keeping the power regulator separate reduces heat build-up on the LED circuit board and therefore increases performance and longevity of the LEDs.

Remote regulators can also be easily removed so that the product can be powered directly with the correct amperage, very useful for integration in some mains voltage applications.
